Canadians are invited to "Put your name in space"

OTTAWA Canadians today were invited to "Put Your Name In Space", by taking part in a national competition to choose a name for Canada's domestic communications satellite. All residents of Canada are eligible to compete. The winner will receive an expenses-paid trip to watch the launch.

The purpose of the public competition, explained Communications Minister Eric Kierans, is "to enable Canadians to participate, in a small but nevertheless significant way, in the satellite project. I hope a great many Canadians enter the competition so that the satellite may be launched bearing a name that is expressive of Canada."

The competition will run through the summer until October 1. Shortly after that date the winning name will be selected by a panel of three judges. The judges of the competition are: Professor Marshall McLuhan, Director of the Center of Culture and Technology, University of Toronto; M. Gratin Gelin, playwrite, Comedie Canadienne, Montreal; and Mr. Leonard Cohen, poet, novelist, singer, Montreal. Their decision will be final.

To bring the competition to the attention of as many Canadians as possible, some 12,000 distinctive, blue and green, Satellite Canada posters are being distributed across the country. These posters carry the slogan "Put Your Name In Space/Mettez Votre Nom En Orbite", and a stylized Maple Leaf flag overlaid with the broadcast beams of the satellite.

Information on the planned communications satellite system as well as the rules on how to enter the competition are

printed on all Satellite Canada posters. For the convenience of the public, official entry forms, postage - paid and pre-addressed to "Satellite Canada, P.O. Box 2745, Ottawa" will be placed in a box at the base of all posters. Members of the public may enter the competition by using these official entry forms, or a facsimile, or by submitting an entry on plain stationery. All entries postmarked prior to midnight, October 1, will be accepted.

The Satellite Canada posters and official entry forms are being distributed to the more than 8,000 post offices across the country. In addition the posters will be displayed at a number of other outlets, including bookstores of the Queen's Printer; the public offices of Canadian telephone companies; ticket offices of Canadian telephone companies; ticket offices of Air Canada and C.P. - Air and Pacific Western Airlines; public offices of Canadian National Telecommunications and Canadian Pacific Telecommunications; distribution centres of RCA - Victor; the "Man and His World" Fair in Montreal (including the space exhibit at the Man and His World Pavilion); House of Commons Information Booth; and the National Arts Centre. As supporting publicity, the telephone companies will enclose information on the competition in their July mailing to their more than 5,000,000 customers.

The basic Satellite Canada posters are printed in English and French. In addition, because of the particular importance of the communications satellite system to Canada's North, a number of posters are being translated into Eskimo and

Indian languages and will be distributed in the Yukon and Northwest Territories.

The satellite, for which the public will choose the name through the competition, is scheduled to become operational early in 1972 and to extend live television and modern telecommunications to the under-developed regions of Canada, particularly the north, as well as supplement existing east-west microwave telecommunications systems. It will be launched by a United States rocket, from Cape Kennedy, Florida. The exact type of rocket to be used is currently being negotiated by Canadian and U.S. officials.

The satellite will be launched into an equatorial orbit at 109

degrees west, approximately south of Winnipeg. The domestic communications satellite system, which will be unique of its type in the world, will be owned and operated by Telesat Canada Corporation, a tri-partite partnership of the Federal Government, private industry and the public as shareholders. Legislation to establish Telesat Canada is expected to receive Royal Assent by the end of June.

You can "put your name in space" by entering the Public Competition to name Canada's Domestic Communication Satellite. Above Communications Minister Eric Kierans holds one of the posters describing the competition and which will be displayed in all Post Offices. (In foreground: A model of Canada's first satellite - Alouette 1).

Transport committee to visit Labrador

H. PIT LESSARD (Lib. - La Salle) chairman of the House of Commons Standing Committee on Transport and Communications said arrangements are complete for the Committee's visit to certain cities in the Province of Quebec and Labrador in early September 1969.

The committee has been empowered by the House to pursue its study of the Transportation problems in the Atlantic Provinces.

The committee, said Mr. Lessard, is planning on leaving Ottawa at 9:00 a.m. on Monday, September 8, and will arrive in Quebec City (Ancienne Lorette Airport) at about 10:30 a.m. The committee will hold public hearings in Levis on Tuesday, September 9, to adduce evidence pertaining to briefs from residents of the Province of Quebec which have been received by the Standing Committee on Transport and Communications.

The committee will leave Levis at approximately 9:00 a.m. on Wednesday, September 10, for Baie Comeau, P.Q., where the Committee will hold hearings. The committee will hear evidence pertaining to briefs received by the Transport Committee from interested parties in that area.

The committee will leave Baie Comeau the same afternoon at about 6:30 p.m. for Sept - Iles where the committee will be hearing evidence pertaining to briefs submitted by interested parties in that area, on Thursday, September 11. In the afternoon, the committee will visit the Iron Ore Company and the Wabush Mines.

At 6:30 p.m., on Thursday, September 11, the committee will leave Sept - Iles for Labrador City. Estimated time of arrival in Labrador City is 7:30 p.m. On Friday, September 12, the committee will hold a hearing in Labrador City to adduce evidence pertaining to briefs received from interested parties in Labrador. In the afternoon, the committee will tour the Iron Ore Company Plant and the Wabush Mines Company Plant. The committee will spend the night in Labrador City.

On Saturday, September 13, the committee will leave Labrador City for Schefferville where it will hold a hearing after which it will leave at about 12:30 p.m. where it is scheduled to arrive in Goose Bay at about 2:00 p.m. The committee will hold a hearing at 2:30 p.m. the same afternoon to adduce evidence pertaining to briefs received by the committee in that area.

On Sunday, September 14, at about 2:00 p.m., the committee will leave Goose Bay for Ottawa. The estimated time of arrival at Uplands Airport is 3:45 p.m.

Ladies brave the weather to play golf

On Saturday, July 19, 29 ladies braved the weather and played in a 'Ladies Get-together' golf morning where the emphasis was on participation rather than skill.

Miss L. Bouzan, chairman of the Ladies Committee, presented the prizes and everyone seemed to thoroughly enjoy themselves. It is hoped to have another get-together fairly soon.

Winners were - Marge Roberts and Gloria Turriff tied with low gross of 49.

Barbara Lambert - lowest score on No. 2.

Jessie Bell - highest score on any one hole.

Doris Myers - greatest effort. Dora Anderson - most enthusiastic golfer.

The men had a two-ball foursome contest in the afternoon and 76 men participated.

Winners - Mike Brennan and John Murphy - low gross 89. Bill Campbell and Bob Patten - low net 73.

Hockey school to begin August 24

Ralph Backstrom's hockey school will be held in Labrador City beginning August 24.

The program for boys 7 to 19 years includes skating, stick handling, shooting, passing, drills and chair talks. Each group will get two hours of ice time a day and each boy plays in his own

age group.

Ball games, tennis, swimming and instructional periods as well as recreational, will be part of the program.

Trophies will be distributed to the best performers and to the students who have given the most attention to instructions

during the week.

Each student must bring his own equipment and hockey helmets are compulsory.

For further information as to registration fees, please call the recreation department at 944-2623, or the Town Hall at 944-2621.

Boys who are interested in playing with one of the above teams, are asked to register at the softball field.

Forest queens visit Labrador

The four forest queens, representing Newfoundland and Labrador, visited here this past week, as part of their cross-province tour.

They were accompanied by Miss L. Russell as chaperon, and Dick O'Neil, director of publicity and education for the Newfoundland Forest Protection Association.

A contest to select the four Queens is held in May each year.

Girls from the Island and Labrador, between Grades 9 and 10 are eligible to enter.

Would you be interested in becoming a Regine de France Counselor

Mrs. Dind will be glad to give you further information

Round & About

It could only happen here!

Planning and foresight is a requirement in day to day living. Yet when the fuel train arrived from Sept Iles last Monday, only one oil company had cars of gasoline. It seems that of the other two, one claims they did not have time to have cars loaded and the representative of the other company, "did not know that the train was arriving". Comments anyone?

THAT'S COMMUNITY SPIRIT

With 80 per cent of Wabush and 50 per cent of Labrador City unemployed, due to the labor situation at Sept Iles, the majority of business firms in the area have been considerate to customers who are not in a position to meet their monthly payments.

Comments from several people have indicated, this is not the case with the Finance Companies. A father of eight children, told the Aurora, that he has been hounded this past week because he can not meet his montly payment. He is unemployed and to date has not received unemployment insurance. This is not one isolated case.

PEDDLE MOVEMENT

Rumor has it that a movement is now being organized in the Twin Towns to acquaint the residents of the apparent lack of interest and action on the part of the federal representative for the district, Ambrose Peddle.

Mr. Peddle declined to attend the citizens meeting held last Thursday evening. A telegram was received by J. Dunkin, chairman of the committee, in which Mr. Peddle expressed his regrets, but due to pressure of House business, he would be unable to attend.

When are the night - time speed demons and tire squealers around the Carol Lake Shopping Center going to be curtailed. We appreciate that the police are doing an excellent job, but as a suggestion, why not park the police car on back, no doubt results would be forthcoming.

A reminder to parents and children.

We have had one accident this past week, when a young boy, a gasoline drum and matches did not agree. The boy received second and third degree burns to his face and head, luckily he is progressing favorably.

Why not impress upon your children, the danger of matches and gasoline, better still remove all containers from your property.

Haven't heard any comment from CBC, Goose Bay, in reply to Tom Burgess' request that the manager be dismissed? A project for the Citizens Committee, should be for an improvement in the radio programs directed to this area, that is when you can tune in the station. We are made aware daily, of the ferry schedule in New Brunswick, the price of pigs in P.E.I. and Mayor Coopers paving program in Happy Valley, but "nary a word" on even the weather from here, unless you happen to be a clock watcher.

HERE'S ONE FOR THE BOOKS

A reporter from a newspaper called long distance, collect, last Thursday night, to obtain the results of the Citizens Committee meeting.

THE COMPLETE BOOK OF MODEL RACEWAYS AND ROADWAYS

by Louis H. Hertz

Get behind the wheel of a sleek racing car and whirl around the track at 150 miles an hour, while packed stands howl their approval as you flash across the finish line - the winner! Or take a leisurely drive in your brand new sports car through the green-covered countryside, stopping at out-of-the-way inns and babbling brooks along the way. Day after day you can enjoy such thrills right in your own home! That's the beauty of today's fastest-growing, most popular indoor hobby-model raceways and roadways.

For its many millions of fans of all ages, Louis Hertz has written the definitive book covering every aspect of model raceways and roadways. The author gives expert advice both on selecting ready-made tracks and cars and on custom-building your own. With 442 detailed photographs, he shows you the available exciting variations of all types and sizes of layouts, from HO to 1/24th size; precision cars that are exact replicas of the real thing; scenic effects that defy the imagination; and hundreds of accessories for both model raceways and roadways.

He explains how to expand your system, how to combine model automobiles and railroads, how to operate your raceway for more thrills and less spills, how to achieve fabulously realistic effects with your roadway, how to construct your own model bodies and mount them on the chassis, plus innumerable other facts every model raceway and roadway hobbyist needs to know.

The author explains electric power for slot cars and describes its multiple uses and hook-ups for running the cars, lighting headlights and buildings, and for split-second control of racing speeds. He describes also miniature gasoline-powered cars, the latest "hot rods", miniature drag racing, and gives pointers on how to form racing clubs.

Here, indeed, is the first complete and practical book for every fan of model raceways and roadways: an indispensable guide for the hobbyist just learning to drive his initial model car, and a goldmine of source material for the experienced hobbyist who is looking for new ways and new construction to add excitement to his already elaborate model setup.

LOUIS H. HERTZ is the author of twelve books on model hobbies, including his famous *The Complete Book of Model Railroading and Collecting Model Trains*. He has published more than 200 magazine articles in such publications as *Model Builder*, *Model Craftsman*, *Model Railroader*, and *Model Roads and Raceways*, and has been editor of several important hobby magazines. He built his first model electric automobile layout in 1937, and in more recent years, in his capacity as advertising and design consultant to leading model and toy manufacturers, played a leading part in the introduction and promotion of the modern product.

FOR THE YOUNGER SET

OMAR THE UNDERCOVER CAT

by Ellen Goins

Omar was a typical cat living with a boy named Greg and his family. Greg liked to call Omar an "undercover cat." To Greg, Omar behaved as though he were a secret agent.

Omar could disguise himself as a squirrel or as a monster; he investigated everything from barrels to bugs; he even guarded the family car and parakeet!

But when Omar became interested in the garbage men, the investigation was not routine!

This is the enchanting story of an ordinary cat whose activities are given a wonderfully imaginative interpretation by his young master. The rich, lifelike pictures cleverly enhance the "Lets-pretend" quality which is so appealing to children.

Ellen Goins spent two years at the American Academy of Art in Chicago before becoming a commercial artist and portrait painter. With over eighteen years of professional experience, Mrs. Goins illustrated her first book, *Red Mouse*, in 1967.

As a mother and cat-owner, Mrs. Goins has given Omar an appealing personality without distortion and has portrayed accurately Greg's vivid imagination.

Tips for better barbecues

Spicy Grilled Ham

3 ham slices, 1/2 inch thick
 1/2 cups spiced grape jelly
 4 1/2 tablespoons prepared mustard
 1 1/2 tablespoons lemon juice
 Combine jelly, mustard, and lemon juice. Brush ham slices with mixture. Broil on hot grill until ham is tender (10 - 12 minutes), turning and brushing frequently with sauce mixture. 6 servings.

Barbecued spareribs

4 pounds fresh pork ribs, trimmed
 1 cup soy sauce
 2/3 cup brown sugar
 2 cloves garlic, minced
 1 teaspoon cinnamon
 1 teaspoon powdered ginger
 1 teaspoon salt
 Mix the soy sauce, sugar, garlic, cinnamon, ginger, and salt together. Spread evenly over the ribs and let stand 20 minutes; then coat again with the remaining sauce or drippings. Grill 1 1/2 inches from the flame for about ten minutes until brown; turn over and brown other side. 4 servings.

Swordfish steaks

6 1/2 pound swordfish steaks
 Juice of 2 lemons
 2 tablespoons olive oil
 1 teaspoon catchup
 1 teaspoon fennel
 1 teaspoon chopped parsley
 Salt and Pepper to taste
 Marinate steaks for one hour in a sauce made of all the remaining ingredients. Shape a shallow foil "boat" to each individual steak. Broil 10 minutes over low charcoal fire, basting with the marinade as steaks begin to cook. Turn steaks (still in foil boats) upside down on grill. Broil 4-5 minutes. Serve immediately. 6 servings.

Grilled oysters

1 pint frying oysters
 2 tablespoons onion, grated
 1 tablespoon celery, minced
 2 tablespoons lemon juice
 1 teaspoon salt
 1/4 teaspoon pepper
 1 tablespoon softened butter
 Drain oysters and save liquor. Divide oysters and place on 5 squares of aluminum foil. Combine oyster liquor with remaining ingredients. Blend well and pour over oysters. Bring up sides of foil and wrap oysters in tight double folds. Place each packet in another square of aluminum foil and wrap again in double folds. Place packets on hot coals; grill 10-12 minutes, turning once. Serve in opened packages. 5 servings.

Barbecued chicken

3 broilers, halved
 1 cup butter
 3 cloves garlic, sliced
 2 tablespoons parsley, minced
 1 teaspoon Worcestershire sauce
 1 teaspoon Tabasco
 1 teaspoon rosemary
 Salt, pepper, and paprika to taste
 Melt butter; add garlic and heat until browned; remove garlic. Add parsley and monosodium glutamate; simmer a few minutes. Add Worcestershire sauce, rosemary, salt, pepper and paprika. Pour over chicken halves and let stand at least 1 hour, turning once. Do not refrigerate. Arrange chicken, cut side down, on greased grill over glowing coals. Grill slowly about 35 minutes, or until tender, turning with tongs and basting often with marinade. 6 servings.

You can fix it

By Gene Von

Automatic Switch

Here's one way that the handyman can make his own automatic switch for turning on light, radio, or other electrical device. It is fashioned from a spring-wound alarm clock and a pull-chain light socket as in the illustration. Add an extension to the alarm-winding key on the back of the clock to take care of the string which is attached to the chain on the socket. Drill hole crosswise through the extension to prevent the string from slipping on the shaft. Then screw a light bulb into the socket or a receptacle plug for whatever appliance you wish to be turned on or off.

Non-slip Knots

You can insure slip-proof knots when tying packages for mailing if you'll just pull the string through a dampened cellulose sponge so as to wet it thoroughly. Then, as the string dries, it will shrink slightly and thus tighten your knots.

Easier Scraping

The strain on your hand will be considerably reduced and you'll provide yourself much better control of your paint scraper with a drawer knob on the top of the utensil, as shown in the illustration. By using both hands, you can apply extra pressure on the scraper when it is needed. The short screw which holds the scraper plate to the handle can be replaced by a longer one which can be screwed through the tool and into the knob.

You are the detective

"Big Ben" Maguire, one of the town's eminent politicians, has been shot and killed as he was coming out of a parking lot on the fringe of the business district this afternoon. You look down at the powerful-looking, six-foot-five-inch figure, now sprawled lifeless on the concrete pavement, his brilliant career suddenly terminated by an assassin's bullet that entered his muscular neck and lodged in his heart.

Later at headquarters, Lieutenant Tom Rogers calls you into his office where he is interrogating a suspect in the murder case. Riley explains what has happened:

"Just a few seconds after the shot was fired, one of our patrolmen, Jim Haney, noticed this young man making his way hurriedly through the crowd that began to gather at the scene, and then running down the street. Haney took out after him and only by a fast bit of running was able to overtake this man. He says his name is Jack Courtland and we have discovered he has a record, several burglary charges — but he claims he's clean on this shooting."

"That's right!" chimed in Courtland. "you got no right to"

"Why were you running?" you break in.

"I just don't like to look at dead bodies. And besides, I was late for a date."

The young man rises at this point from his chair, lights a cigarette, and paces nervously about the room. Your eye is caught by his dapper appearance and flashy taste in clothes . . . the multi-hued sportcoat, the huge Windsor knot in his brilliant necktie, the blue suede sport shoes. Despite his lack of height, which you estimate at about five feet and a half, he cuts a figure of sartorial elegance.

"You have nothing more to add?" you ask him.

"Nothing more than what I've told the Lieutenant here. I heard the shot . . . thought at first it was a car backfiring . . . then I saw the body lying there on the pavement . . . that was enough for me . . . so I left."

You nod your head reflectively, then you turn to Lieutenant Rogers. "It looks as though you'll have to release this man. He couldn't have shot Maguire."

What has led you to this conclusion?

SOLUTION

The five-foot-six-inch Jack Courtland could hardly have fired a bullet into the neck of the six-foot-five-inch Ben Maguire, and have the bullet take a DOWNWARD course into the victim's heart.

SCOUT ACTIVITIES —A group of Boy Scouts (above) settle down to write examinations on what they have learned. (Below) Scouts put what they learned into action.

473,040,000 seconds of death

It was an obituary that really set you thinking: "A man, age 36, dies after 15 years in hospital, following an auto accident in which he was totally disabled."

Fifteen years of staring at the same ceiling; 180 months of complete dependence upon others; 780 weeks of hope-erosion, with expenses towering to crowd everything else off the skyline; 5,475 days of waiting for the night; 5,475 nights of waiting for the day; 131,400 hours of four walls, fading flowers, medical smells, useless sympathy; 7,884,000 minutes of vegetation with roots withering in hopelessness, spirit shrinking in stagnation; 473,040,000 seconds of death before burial.

And probably because of some "little" fault that you might be committing every day of your driving life. Such as failure to glance left and right,

or forgetting to check your rear-view mirror. Squeezing one more trip out of bald tires. Crowding the car ahead. Leaning on luck in a blind spot. Trying to average 60 on a 50-mph road, or in 50-mph conditions. Or just plain, blind assumption that the other driver will do the right thing.

Death at 36 after 15 years of dying! Within that period of time a man usually marries, has a family, climbs in the world, travels, plays, begins to mature, enjoys a million sights, and sounds.

Over these same 15 years, this man was a castaway on a lonely bed-island. He absorbed tasteless

 CANADA
GOVERNMENT OF CANADA
STANDING COMMITTEE OF
TRANSPORT AND
COMMUNICATIONS
 The Standing Committee of the House of Commons on Transport and Communications will hold public hearings in the following cities to pursue its consideration of transportation problems in the Atlantic Provinces.
 Levis, P.Q., September 9, 1969
 Baie Comeau, Quebec, September 10, 1969
 Sept Isles, P.Q., September 11, 1969
 Labrador City, Newfoundland, September 12, 1969
 Schefferville, Quebec, September 13, 1969 (Morning)
 Goose Bay, Newfoundland, September 13, 1969 (Afternoon)

Those who have already submitted briefs and who wish to modify them should send the modifications to the undersigned, on or before August 25, 1969. However, such modifications should be major modifications. A new brief may be submitted. Those who wish to appear before the committee should send 40 copies, English and French, or their brief, on or before August 25, 1969, to the undersigned. They will be notified of the time and place of their appearance in due course.
 Mr. Robert Normand
 Clerk of the Standing Committee On Transport and Communications
 House of Commons
 Ottawa

food, slept a desperate sleep, suffered, cursed, cried, felt the bitterness wind his insides into knots at such ordinary sounds as laughter, free footsteps and hearty talk.
 For every person who dies in traffic smash-ups, many others spend agonizing weeks, months, lifetimes of disability.
 You risk this as well as a quick ending when you commit those "little" driving errors. Do you realize this? Do you know what errors are yours, and what you must do to correct them?

this week in ASTROLOGY

BY CARL PAYNE TOBEY
ILLUSTRATED BY DEGRAZIA

PAST

SECRETS OF HISTORY

History is selective. History of a war depends on who wins. The winner writes the history. In World War II both sides employed astrologers. Hitler employed Karl Krafft, but put him in a concentration camp when he didn't predict what Hitler wanted to hear. He died there. Winston Churchill employed Louis de Wohl and sent him to the United States to call on editors of astrology magazines and convince them that the Allies would win, and to get the U.S. into the war. Credit Sydney Omarr for running this down.

THE LIBRA WOMAN

She might be a bit hesitant and backward because she is never sure of herself. She is apt to keep her greatest talents secret. She needs encouragement. When love comes along she is receptive but ready to be disappointed. Until men know and understand her, she may seem a bit distant or stand-offish. It's just that she is uncertain and doesn't want to be drawn into a discussion for which she isn't ready. Beneath that surface she's a gem, particularly when she knows she is loved.

PRESENT

FUTURE

★ TOBEY'S PREDICTION:

We are nearing the end of racial strife. It will die out, as we enter 1970. Unconsciously, the sex factor was in the background of all our riots and turmoil, but Neptune will soon leave Scorpio, the sex sign, after 14 years, and will enter Sagittarius. The drive will be in a new direction. Most people will want to go back and live with their own kind, as they always have. The ill feelings and violence will subside. In its place will come greater curiosity about the unknown, and people will want better answers than before. This can have a telling effect upon both religion and science. The ultimate effect will be good.

YOUR WEEK AHEAD

♈ ARIES
Mar. 21-Apr. 19

Opportune for action through Thursday. Protect home interests thereafter. Pioneering urges very strong.

♉ TAURUS
Apr. 20-May 20

Monday and Tuesday show progress, but entire week is with you. Don't procrastinate. Get in action.

♊ GEMINI
May 21-Jun. 21

Restless, but make hay while the sun shines. Take constructive action. You are on the right track.

♋ CANCER
Jun. 22-Jul. 22

Entire week more in your favor. You can better afford to follow your own judgments. More stable now.

♌ LEO
Jul. 23-Aug. 22

Get off to a new start this week. Handle the things that are important to you. You can help others.

♍ VIRGO
Aug. 23-Sep. 22

Be careful of what you do or say on Tuesday. Otherwise, the week is more on your side. Push plans.

♎ LIBRA
Sep. 23-Oct. 22

After Sunday, have confidence in yourself. Be making your plans ahead. You will be on the up-grade.

♏ SCORPIO
Oct. 23-Nov. 21

Monday and Tuesday require caution. Don't be impulsive. Thereafter the design will be growing better.

♐ SAGITTARIUS
Nov. 22-Dec. 21

Your judgment may not be good this week, particularly from Wednesday thru Friday, you can err.

♑ CAPRICORN
Dec. 22-Jan. 19

Monday and Tuesday best for creative efforts. Slow down thereafter. Don't travel this coming weekend.

♒ AQUARIUS
Jan. 20-Feb. 18

A mediocre week, but Wednesday thru Friday can be propitious for independent and creative efforts.

♓ PISCES
Feb. 19-Mar. 20

Wednesday thru Friday warn to look out for your own personal interests. Rest of week okay.

WHICH ZODIAC?

The course of the earth does not remain in the same position among the stars but gradually changes. A minority of astrologers, mostly in India, use a zodiac based on the fixed stars. This is an attempt to materialize astrology, base it on something material rather than mathematical, for they do not understand the mathematical. We have searched worldwide to determine the plane of such a zodiac if it exists. Nobody can tell us its plane, and until they do, it cannot be measured. They are unconsciously using the earth's orbit as a frame of reference, which has nothing to do with fixed stars that are not fixed, but in slow motion.
